NUMBR5	Page 1	F-key	Button label (complete)	Full name	Description (extended)	Type	Flag name	Additional information	Catalog	Default	Status
F1	ACC	Accuracy	Accuracy of the integrator (reserved real variable)	Variable (real)		TI : ACC :	ACC	0			
F2	ADM	Angular display mode	Angular display mode (system real variable, write protected)	Variable (longint)		SBI : 4 <sup>0</sup> ; 4 <sup>1</sup> ; 4 <sup>2</sup> ; Info : RAD: 2 ; ; GRAD: 4 ; DEG: 0 ; [D.MS: 1 ; MULm: 3]	ADM	0			
F3	CPER/a	Compounding period	Compounding period per annum (reserved real variable)	Variable (real)		TI : CPER/a = Compounding periods p.a. =	CPER/a	12			
F4	D.MAX	Maximum denominator	Maximum denominator (system long integer variable, write protected)	Variable (longint)		SBI : /nnnn ; /max ; Info : Range is 2.9999 or 0, indicating DMXmax = 32500	D.MAX	64			
F5	FV	Future value	Future value (reserved real variable) ; displays as F in menu TVM when value is large	Variable (real)		TI : FV = Future Value =	FV	0			
F6	GRAMOD	Graphics mode	Graphics display mode for AGRAPH (reserved long integer variable)	Variable (longint)		Info : OR: 0 ; SET: 1 ; OFF: 2 ; XOR: 3	GRAMOD	0			

fShifted F1	ISM	Integer sign mode	Integer sign mode (reserved long integer variable)	Variable (longint)		Info : SIGNMT: s ; UNSIGN: u ; 1COMPL: 1 ; 2COMPL: 2	ISM	2	
fShifted F2	I%/a	Annual interest rate	Annual interest rate as percentage (reserved real variable ; Use 10 for 10% not 0.1)	Variable (real)		TI : I%/a = I%/YR = APR =	I%/a	0	
fShifted F3	NPPER	Number of payments	Total number of payments	Variable (real)		TI : NPPER = n pay periods =	NPPER	0	
fShifted F4	PMT	Payment	Payment (reserved real variable) ; displays as P in menu TVM when value is large	Variable (real)		TI : PMT = Payment =	PMT	0	
fShifted F5	PPER/a	Payment period	Payment period per annum (reserved real variable)	Variable (real)		TI : PPER/a = Pay periods p.a. =	PPER/a	12	
fShifted F6	PV	Present value	Present value (reserved real variable) ; displays as P in menu TVM when value is large	Variable (real)		TI : PV = Present Value =	PV	0	

gShifted F1	REALDF	Real number display format	Real number display format (reserved long integer variable, write protected)	Variable (longint)		Info : ALL: 0 ; FIX: 1 ; SCI: 2 ; ENG: 3 ; SIG: 4 ; UNIT: 5	REALDF	0	
gShifted F2	↕LIM	Upper limit	Upper limit for solvers and integrator (reserved real variable) ; displays as ↕L in menu Tools or Tool  when value ≠ 0 ; set interactively and by realSlv <sub>↕</sub> , cpxSlv <sub>↕</sub> or J <sub>↕</sub>	Variable (real)		TI : ↕LIM :	↕LIM	0	
gShifted F3	↕X	Upper limit of drawing interval	Upper limit of drawing interval (reserved real variable) ; set interactively and by Draw <sub>↕</sub>	Variable (real)			↕X	10	
gShifted F4	↕LIM	Lower limit	Lower limit for solvers and integrator (reserved real variable) ; displays as ↕L in menu Tools or Tool  when value ≠ 0 ; set interactively and by realSlv <sub>↕</sub> , cpxSlv <sub>↕</sub> or J <sub>↕</sub>	Variable (real)		TI : ↕LIM :	↕LIM	0	
gShifted F5	↕X	Lower limit of drawing interval	Lower limit of drawing interval (reserved real variable) ; set interactively and by Draw <sub>↕</sub>	Variable (real)			↕X	-10	
gShifted F6	#DEC	Current number of digits	Current number of digits as set in DISP menu (system long integer variable, write protected)	Variable (longint)			#DEC	3
